

Independent Capacity Advocacy (ICA)

Our Independent Capacity Advocate acts as a legal safeguard to help protect people who lack the capacity to make some important decisions for themselves. The lack of capacity may be as a result of dementia, a significant learning difficulty or brain damage.

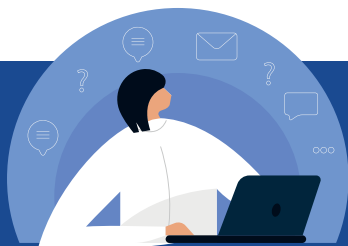

We will provide support and representation when significant decisions need to be made about the following.

- Serious Medical Treatment
- Move to accommodation
- Change of accommodation
- Safeguarding vulnerable adults
- Care review
- Significant Restrictions on Liberty (SROL)

Anyone over the age of 16 who lacks capacity or has fluctuating capacity and who has no family or next of kin has the legal right to access an Independent Capacity Advocate.

The ICA will ensure their client's rights, wishes and interests are represented and that they remain at the centre of the decision-making processes.

At My Voice, our advocacy services are free, independent and confidential.
